DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9, 13-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is being hydrolyzed in formula 1, especially if R3 is an organic residue.

It is unclear in claim 1 if T1 and R2 each separately for cyclic substituents, or they form a cyclic substituent together.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 199829561 (WO 561).

WO 561 teaches preparation of the following compound:

from

using a

lipase, see pages 3 and 4.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Forro et al., Mini-Reviews in Organic Chemistry (2004), 1(1), 93-102 (Forro) or Forro et al., Organic Letters (2003), 5(8), 1209-1212 (Forro II) or Kanerva et al., Tetrahedron: Asymmetry (1996), 7(6), 1705-1716 (Kanerva) in view of WO 561.

Forro II teaches the following reactions:

Art Unit: 1621

and Kanerva teaches the following reaction:

Notwithstanding that Forro II and Kanerva do not teach the specific compounds required by the claims, Forro and WO 561 teach the required compounds can be made by lipase hydrolysis. For example, Forro teaches the following reactions:

Scheme 1.

Art Unit: 1621

Scheme 3.

Scheme 4.

Therefore, it would be well within the purview of those of ordinary skill to any desired beta amino acid by lipase hydrolysis, including those of the instant invention.
